

EarthPro Hot Cups

EarthPro Hot Cups are made from annually renewable resources. The unbleached paper stock is derived primarily from sugarcane which is harvested annually. We take the waste product and repurpose it into cups. The moisture barrier or coating is made from PLA. EarthPro Hot Cups & CPLA Lids are BPI Certified Compostable.

Our new 90mm 8 oz. cup allows operators a wide facing for latte art and a single lid to fit 8/12/16/20 oz. sizes. Custom Printing Available.
